

Art Exhibition 2018

On Wednesday 13th July we held the Private view of the Art & Design Faculty end of year exhibition in the school library; the exhibition celebrated the culmination of the Art AS, A level and GCSE and the AS, A level and GCSE Product Design courses. Parents, extended family, friends and members of the Huntingdon Arts Society attended the exhibition, along with school staff and governors. On display were final outcomes, sketchbooks and 3D models.

The students at St. Peter's produced some excellent work demonstrating a willingness and ability to take risks, be creative and solve problems within their work. The diversity of the work demonstrated the enjoyment of the subjects and the range of ideas and skills of our students. The students should all be congratulated for the dedication to their studies in the production of a portfolio of work over the duration of the course. The sketchbooks were visually interesting with a range of careful observational studies, experimental techniques and thoughtful comments and analysis of the work they studied. The product design architectural and hobby kit models demonstrated the ability of the students to research, design, solve problems and present working outcomes which would function in industry. The exhibition was a clear example of the valuable skills developed in creative subjects that can be applied to the future study of art and design or any other subject area.
